Schools

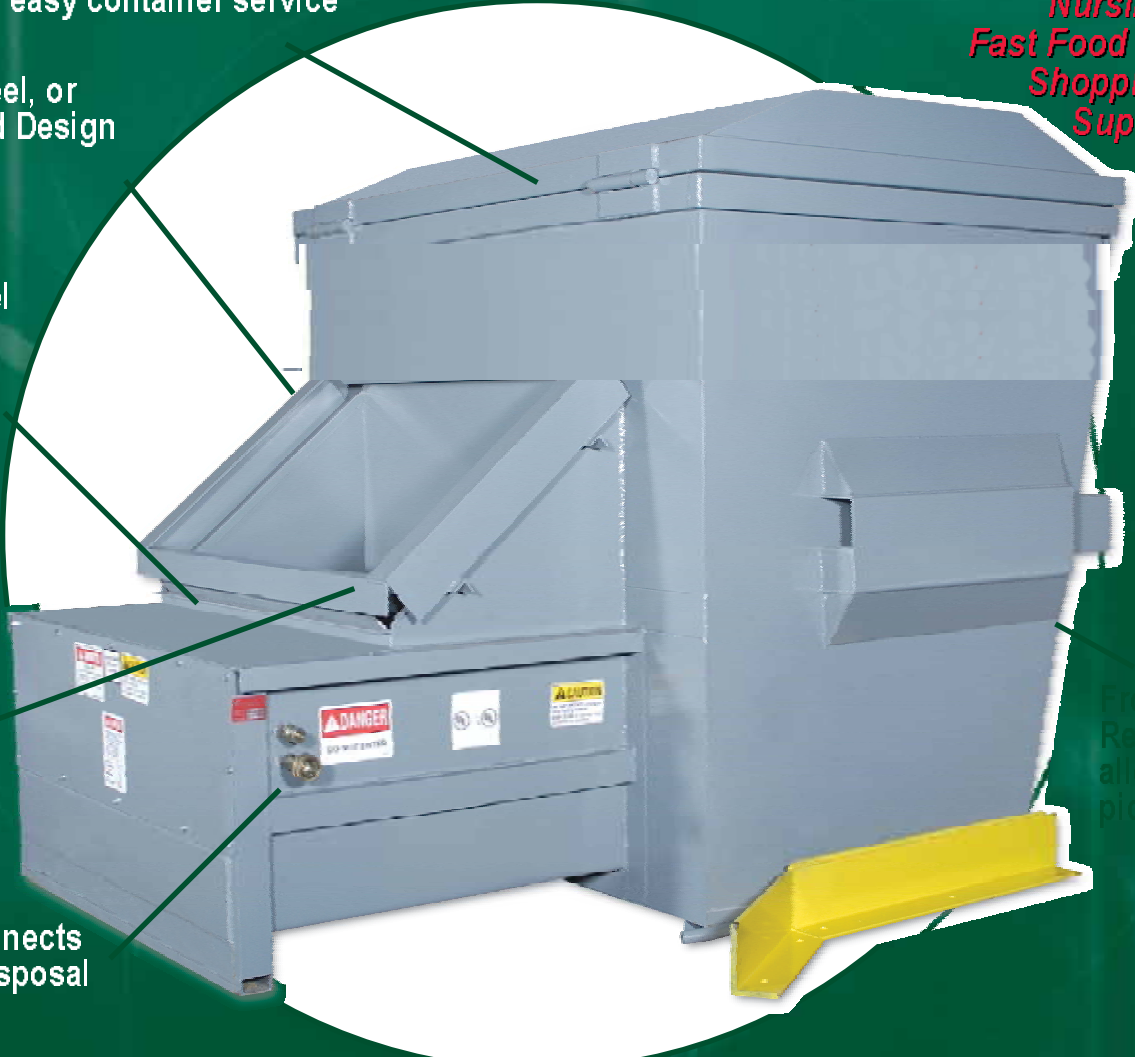

Plastic, Steel, or Chute Feed Design

Heavy Duty Structural Steel Design stands up to the constant pounding of being emptied

Feed Opening is 46" x 22" to handle large bags or boxes

Hydraulic Quick-Disconnects allow easy disposal service

Front Load or Rear Load can allow haulers to pick up on route

The most economical Self-Contained Front Load Container with remote power unit, designed for wet or dry waste and easy pickup. Designed for those generating a minimum of 20 cubic yards of refuse a week, the Pak-Container is liquid tight with continuously welded seams that eliminate leaking to maintain a clean, friendly environment.

Portable Self-Contained Compactor (PSC)

PSC Dimensions

Totally

 Listed

MODELS	A	B	C	D	WEIGHT
PSC-4	85"	81 3/4"	65 1/4"	43 1/4"	2700 lbs
PSC-6	98 1/4"	81 3/4"	77 1/4"	43 1/4"	2900 lbs
PSC-6RL	148"	78"	84 1/4"	43 1/4"	3400 lbs

The PSC is compatible with a majority of front and rear load vehicles. The low profile makes it easier and safer for drivers to see over the unit. It features a remote power unit and a Tri-Voltage motor with quick disconnect which allows for ease of service. These features make the PCS one of the most economical and simplest to use self-contained front or rear loading containers on the market.

- Doghouse Enclosure
- Plastic Lids
- Security Chute
- Cart Dumper
- Deodorant System
- Oil Heater
